I ripped a CD of Pierre DuBois compositions played by Katahn into both players. My wife's aunt, Enid Katahn, is a classical pianist who has had a number of CDs published by smaller labels. Inquiring minds would like to know. I had similar results with less-obscure classical CDs. For example, let's look at Telemann: Suites Concerto in D Major: But when I manually searched the database, the correct information popped up: Once again, iTunes found the correct CD, but lacked album art. Now let's dig into my checkered musical past. But we've got some great stuff coming up. Jeremy Atkinson has been spending quality time with some nifty extensions for Photoshop, and shares his findings. This means moving a lot of the classical music CDs we have onto the hard drive, since my wife Jan is a big classical music buff. For various reasons, I rip using both iTunes and Windows Media Player, using each player's respective lossless codec. For instance, if an album charts on January 27, it's total number of listens will be from the January 12-January 18 tracking week. Sales and Streaming While album sales are dropping in recent years, the use of streaming services is rising. 1. one of the most pompous, overblown pieces of progressive rock from an era of overblown, pompous progressive rock. Nielsen tracks radio stations all over the country and measures what songs are being played. I had to manually add those. I have a few guilty pleasures, and I'm admitting to the entire world that I have a problem. So I'm leaving the inmates to run the asylum while I'm gone. The situation today, when it comes to retrieving information about music CDs, is considerably better than the early days of CDDB (now Gracenote.) But it's still far from perfect. Now that I've got a pretty good setup for broadcasting digital music around the house, I've wanted to make the music more widely available to other family members. MORE FROM QUESTIONSANSWERED.NET I've recently been ripping some fairly obscure—and some not so obscure—CDs from my collection onto my PC, using both iTunes and the recent beta of Windows Media Player 11. Microsoft manages to mangle the CD information in a different way. That's right, we have no song data, but the album art is correct! Actually, I'm being a little unfair here. The data analytics company Nielsen tracks what people are listening to every week in 19 different countries and compiles the information for Billboard music charts. Mainstream Top 40 The top 40 hits are pulled by the Hot 100 list published weekly by Billboard magazine. However, it couldn't supply album art. This information helps Billboard track the top songs in the country. When you try to manually get the album art, there seems to be none available. Ironically, I added the album art to iTunes by copying the bitmap that had been stored in the Windows Media Player 11 library. Let's get even more obscure. Jason Cross attempts to answer the question: What exactly is DirectX 10? But you'd think that the record publishers would actually supply the correct information to Gracenote or Microsoft... but then, maybe not. So if you searched for "Mark Knopfler," you'd only find two songs from that album. What's the name of that song again? This Week on ExtremeTech I'm taking off on vacation for the next three weeks, heading out to England and Scotland with the family. In fact, I could have just left in one listing. Playing a music video on YouTube also counts as a song play. The curmudgeons at the RIAA probably think that this encourages piracy. Those are just a few of my problems. It's embarrassing, I know, but there it is. I have a CD of Emerson, Lake and Palmer's Works Vol. This includes venues, mass merchants, retail chains, independent stores and digital downloads. There was the time WMP10 ripped a Mark Knopfler CD (Sailing to Philadelphia) and proceeded to create five or six different entries, with one or two songs, for each of the different artists who worked with Knopfler. Read about getting audiophile sound wirelessly throughout your home. I can certainly understand the difficulties inherent in the sort of pattern recognition needed to ID CDs properly, since music CDs don't have metadata information stored on them. You can also view the top played songs on the radio, top streaming songs, top digital song sales and top hits of the year. Hot 200 Albums Chart The Hot 200 Albums Chart tracks the top-selling albums of the week. Then, on a whim, I tried searching for the album info by artist name. So let's click through the "Next" button and see what we find. Clicking on the Dubois Music for Piano entry and pressing next yields what we need. So why couldn't Windows Media Player identify the CD when it was inserted? Meanwhile Victor Loh takes on yet another NAS storage device. Finally, we'll be announcing the first weekly case mod winner this Friday. Be sure to check out ExtremeTech's weekly podcast. Music consumption is up, but music sales are down. Radio The biggest AM/FM radio in the world is iHeartRadio. Radio is still the most popular way to consume music. This is definitely a guilty pleasure. Apple's software gets all the tracks right from both CDs (it's a two-parter), but I had to add the "live" tag to distinguish the extra live tracks from the studio tracks. Radio: Once a song becomes popular enough to be picked up by radio stations, it can gain a lot of traction and earn a spot on the Billboard Hot 100. And speaking of inmates in an asylum, don't forget to watch the latest DLTV, with those nutty guys, Patrick Norton and Robert Heron. You can watch the music video and listen to almost every song directly on the Billboard website. In addition to the Hot 100, Billboard also tracks the Billboard 200 and the Artists 100. Both seem to handle CD data differently. There are a number of factors that determine whether a song makes the top 40 list. But the Microsoft database seemed to contain data from an earlier version of Works Vol. 1, since the added live tracks were unidentified. Here are the answers to the Christmas Songs Picture Quiz: O Little town of Bethlehem (little town) Last Christmas (calendar - needs to be updated every year) Rudolph the Red-Nosed Reindeer 12 days of Christmas (sign in window 9 days, 3 to go) Santa Claus is coming to town (text message from Santa) Away in a Manger (a "weigh" in a manger) 2 Become 1 (2 divided by 2) Killing in the Name (got to #1 in protest of the X factor - "NAME" chalk outline) Rockin' around the Christmas tree (guitars round tree) Silent Night (silent sign in stars) White Christmas (graffiti) Christmas Wrapping (in window at top right) All I want for Christmas is You (list on left) Jingle Bells (in centre - gin-gull-bells) We 3 Kings of Orient are (3 kings at back - they are Leyton Orient players) Little Drummer Boy (shadow on right) Mistletoe and Wine (in window at top right) The Holly and the Ivy (on wall on left) Fairytale of New York (fairy, tall and big apple) Step into Christmas (step at bottom left) Stay another Day (street sign in London East 17 - an extra day has been added to the initials of the days of the week) Santa Baby (baby on right) Jingle Bell Rock (bell and rock) Walking in the Air (man in stars) Good King Wenceslas (St. Stephen's restaurant on far right) Driving Home for Christmas (car going towards house in distance) Frosty the Snowman (on balcony) Do they Know it's Christmas? For an artist to make the Top 40, he or she needs to have high radio plays. A rite of passage for musicians is having a song on the top 40 hits radio chart. Take for example Gorecki's Symphony No. 3. They include: Sales: Nielsen tracks all of the physical and digital record sales from 19 different countries including the United States and Canada. But if you manually tell WMP11 to retrieve the CD information, you get a complete listing. On the other hand, iTunes immediately recognized the CD and identified the tracks and label correctly. Along the way, I've uncovered annoying anomalies in both apps in the way they retrieve information from their respective CD information databases. Over the years, I've been gradually ripping my CD collection. 1. The Microsoft database recognized CD 1 properly, but included all the song information from both CDs, even though I had only ripped CD1. Streaming music: The number of plays on online radio stations like Pandora, Spotify, Apple Music, Yahoo Music and AOL Music are counted toward the total number of streams. When you first insert the CD, Windows Media Player 11 doesn't recognize the content. To track sales and streaming, the Hot 200 Albums Chart schedule is delayed by a few days to encompass a full week of sales. Billboard Hot 100 The Billboard Hot 100 is published weekly by Billboard magazine. Often, the artist with the top-selling album is different from the artist with the top-selling single on the Billboard Hot 100. (Happy Easter sign) The live tracks weren't on the original version of Works Vol. Apple's iTunes uses the aforementioned Gracenote database. It's a list of the most popular 100 songs in the U.S. Billboard also tracks whether a song is higher or lower on the charts each week, its peak position and its total weeks on the chart. Once again, iTunes correctly identified the CD, artist and track information—but no artwork. WMP11 was completely baffled. When I manually tried to add the album information, WMP11's service list was unhappy. When I inserted CD2, the screenshot above appeared. I had to manually split out the songs that were on CD2 from the CD1 list, which contained all the songs. Microsoft operates its own CD information database. There also seem to be glitches in both, in certain cases. The Hot 200 Albums is released each Friday which is also the global release date for most new albums. In recent years, audio- and video-on-demand streaming services have set record highs for streams.
